

Merrill Perspectives Podcast

HOST BIO: **Stephen Sparkes**

is the head of Cyber Security Technology within the Global Information Security team at Bank of America. Stephen's 750-plus person team is responsible for technology architecture, innovation and integration for all security related technology across the bank.

Prior to joining Bank of America, Stephen held multiple leadership roles on Wall Street, including CIO for Barclays Capital in the Americas, CTO for Investment Banking and Capital Markets, co-head of Infrastructure, and head of Technology and Information Risk at Morgan Stanley. Earlier in his career, Stephen headed Fixed Income Technology for Credit Suisse First Boston, was a Stratus systems engineer for Salomon Brothers, and started out as a programmer for Logica working on ATM and point-of-sale systems. He also spent a year at an enterprise middleware startup, Incapture Technologies, before joining Bank of America.

Stephen is based in New York.
